Dear Citi ICG Human Resources,

I am a student from Stony Brook University and expect to graduate with a Bachelors of Science in Computer Science in May 2019. I saw the posting for the Citi ICG Technology Full Time Analyst Program on Handshake, and I am interested in this position because of Citi's mission in enabling growth and progress.

From you posting, I realize that you are looking for a candidate with a dedication for learning. I believe that I am a great fit because of my commitment to education in teaching. In my current role as a High Performance Computing engineer, I am responsible to educate users of the cluster on how to utilize the system effectively, which is very technical in nature. As such, not only do I have to be effective in teaching the customers but I must also maintain a complete understanding of how to use the system through constant learning. Thus, I am committed to learning through my current role.

Furthermore, I would like to highlight my ability to work in a team environment because of my flexibility and initiative in team roles. One such experience I had as the President of Go Club was the opportunity to broadcast a professional match. However, I had to take a greater role to ensure the success of the tournament, and took it upon myself to organize recorders and create promotional materials for the event. I am effective in working in a team with my previous experience as club President through leadership and role playing.

With my skill in teaching and experience in working in a team environment, I believe that I am a strong candidate for this position. Thank you for the time in reviewing my application and I look forward to hearing back from you to discuss this position further.

Sincerely,

Benjamin Yu
